

Public Speaking
through Virtual Reality

CHIARA

CHIARA

How does it work?

Thanks to the immersive capability of virtual reality, you will be able to face an environment that is true to the quotidian situations that happen during any presentation, meeting or seminar.

During your speech, Chiara will analyze aspects that influence communication, providing you with a personalized training and all the techniques to improve where you need it the most through the virtual coach.

Improve as a communicator and convince your audience. Chiara helps you reach the conviction level you need...

Immersive Experience

The Chiara VR mobile app helps you practice control of the nerves and stage fright that come before to any presentation, in a very real virtual scenario.

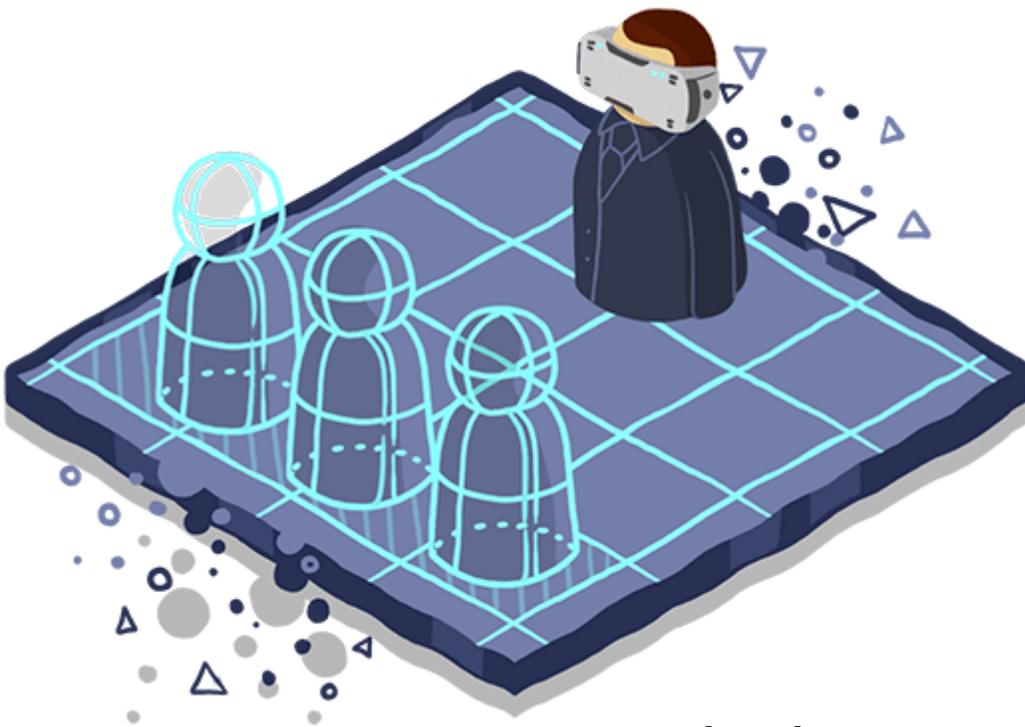

Personalized Coaching

Chiara analyzes in real time the parameters of your speech that affect fluidity, confidence, credibility, engagement and influence.

Analytics

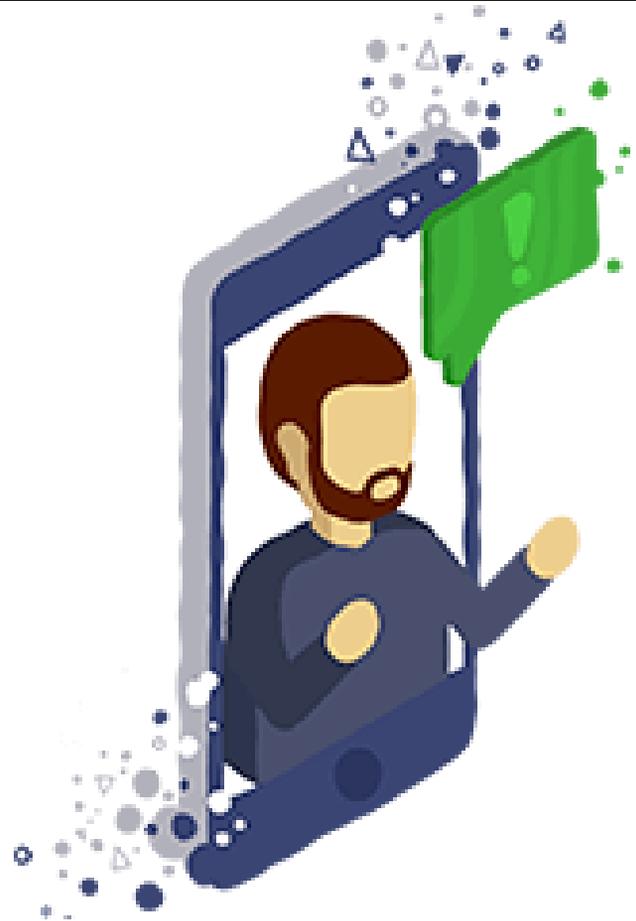

Chiara combines the most advanced analytics capabilities on the market, including voice decomposition algorithms, natural language analysis and gaze monitoring.

Live the best immersive experience

Do you have an important presentation? Practice real speeches by uploading your presentation to the virtual room, get to know your audience, monitor their reactions and adapt your speech to be more convincing.

Submerge into a virtual world whenever you want, all you need is your mobile phone and the Chiara glasses.

Totally Personalized Coaching

Can you imagine having a communication expert coach at your disposition? After each presentation, Chiara provides you with feedback and tips aimed at your improvement.

Discover which areas you need to train and practice the tricks that will allow you to shine in a presentation.

The most advanced analysis of your communication

Thanks to artificial intelligence, Chiara eliminates subjectivity and analyzes your communicator profile in a personalized manner.

Chiara has more than 200.000 feedback combinations and simultaneously controls the most important oral communication parameters: volume, intensity, intonation, pauses and silences, fillers, clarity...

CHIARA

A complete training with theory and necessary practices to achieve measurable results in a short time

Why Chiara?

Chiara is the course your enterprise needs. It has elements of motivation and constant dynamism to achieve the student's engagement.

Students can execute 20 times more practices, in comparison to any other AI in-person course.

Chiara adapts to the needs of each student and to their availability. With Chiara, students get a one on one coach that will guide them during the entirety of the course.

Types of audience
Connection with audience

Master Techniques

Magic in your presentation
Great presentations: Steve Job's keys
Take it with humor

It is very simple, you only need a smartphone and the VR glasses that Chiara includes for every student

A person's hands are shown holding a black smartphone horizontally. The back of the phone features the 'CHIARA' logo in white, which includes the word 'CHIARA' followed by a stylized graphic of three slanted parallel lines. The phone is held against a dark background filled with numerous out-of-focus, circular bokeh lights in shades of yellow, white, and purple. The overall scene is dimly lit, with the primary light source being the bokeh lights and the phone's own light.
